

Nest Protect

The smoke and carbon monoxide alarm that thinks, speaks and alerts your phone.

Meet Nest Protect.

There's never been a smoke and CO alarm quite like this. Nest Protect looks for fast-burning fires, smoldering fires, and carbon monoxide. It also speaks up when there's a problem, can be hushed from your phone, and it will even message your phone in case you're not home.

How does it work?

Get alerts on your phone.

Nest Protect can send you a message when there's a problem or the batteries run low.

Tells you what and where.

Nest Protect speaks up if there's smoke or CO and tells you where it is, so you know what to do.

Sees the CO you can't.

Carbon monoxide is an invisible, poisonous gas. Nest Protect tells you where it's hiding.

A light in the dark.

Usually Nest Protect has its light turned off, but when you walk underneath it, Pathlight can light your way.

Every second counts.

The Split-Spectrum Sensor looks for both fast and slow burning fires.

Hush from the Nest app.

Just burned the popcorn? App Silence lets you quiet the alarm from your phone.

10-year life span.

Nest Protect's long-lasting sensors help keep you safe and sound for up to a decade.

Sleep safe and sound.

Nightly Promise is a quick green glow when you turn out the lights that says everything's working well.
